TRUSTEES' REPORT.

*To His Excellency the Governor and the Honorable Council
of the Commonwealth.*

The statute makes it the duty of the Trustees of the Lunatic Hospital at Worcester to make "a full and detailed annual statement of the condition of the hospital for the use of the government." In compliance with this duty we herewith submit the fiftieth report of the institution under our charge.

The Trustees have made frequent visits to the hospital, and have endeavored to make themselves familiar with the details of its management, both as regards its financial condition and its care for the unfortunate class for which its shelter and protection are provided.

We confidently express our satisfaction with the present management and condition of this institution. We believe, that its finances are carefully and prudently administered, and that the patients have every comfort and convenience which their condition allows.

We invite your attention to the reports of the Treasurer and Superintendent, which are appended.

There have been but few changes in the administration during the year. Dr. Charles A. Peabody resigned his place to take the superintendency of the City Hospital of Worcester. Dr. E. V. Scribner was appointed to fill his place. The medical staff has been further increased by the appoint-

ment of Dr. Everett Flood and Dr. John A. Houston. The confidence we have had in the Superintendent, and those associated with him in the management of the institution, is fully justified by the experience of the past year.

At the date of our last report, Oct. 1, 1881, there were in the hospital 588 patients. There have been received during the year 310. There have been under treatment during the year 898; of these, 55 are reported as having recovered, 79 have left improved, while 27 have been discharged unimproved, and 55 have died.

There remained under treatment 681 patients, Sept. 30, 1882; of these, 144 are State patients, 433 are town patients, 104 are private patients.

When the hospital was opened, in 1877, the grounds about it were in the rude and rough condition incident to a new building, where much grading had been required. It has been the effort of the Superintendent to put the grounds into such shape that they would be pleasing to the eye and of service to the institution. Much has been done in this way, but yet much remains to be done. The extensive lawn in front of the building is now covered with a rich and beautiful growth of grass, at a very slight expense, by utilizing a portion of the sewage.

The farm is improving year by year; portions of the land have been drained and the stones removed. During the year a piggery 210 feet in length, and admirably adapted to its purpose, has been built at a cost of \$3,800. Also a new wagon shed at the barn. The farm buildings are now in good repair.

The greatest improvement of the year has been the new and abundant supply of water that has been secured. Great anxiety has been felt lest the supply of water should prove inadequate in case of severe and prolonged drouth. The Superintendent called our attention to this subject in his last report. After mature deliberation the Trustees voted, on the 7th of February, 1882, to ask the legislature for a grant of \$25,000 to secure an additional supply of water. At that time the only feasible plan seemed to be to receive the water by pumping from Lake Quinsigamond. But on consultation with the authorities of the city of Worcester it was

decided that a sufficient supply could be obtained from the Worcester "high service" at a much less cost. The Trustees accordingly modified their application to the State for an appropriation of \$10,000, which was at once granted, and the work was vigorously pushed forward and completed on the 17th of June, at a most opportune time, for the drouth during the summer was unprecedented, and but for this additional supply the institution would have experienced serious trouble. The total cost was \$7,329.96. A balance of the appropriation, with interest, \$2,715.87, has been returned to the State treasury.

We have no debt to burden us, and by advantageous purchases, which we are able to make by means of the moderate surplus at our disposal, and by economical expenditures, we are able to carry on the institution without any appropriation from the State beyond the moderate allowance the State pays for its own patients.

It will be remembered that there was a tract of about ninety acres of land connected with the hospital, and not needed for its use, which was placed under the care of the Trustees with authority to sell it according to their discretion. While we have not been disposed to force the land on the market, we have availed ourselves of every desirable opportunity to sell, and there have been sold since the act of 1870, 9.74 acres, for \$91,074.34, including the land sold to the Commonwealth for the Normal School, amounting to \$25,000. The demand for the land has increased of late, and the sales have been more numerous for the last year than before since the act authorizing the sale. There remains of this outlying land about eighty acres. A fair estimate of the value of this land is \$150,000, which we shall sell as rapidly as opportunity offers.

The Trustees repeat the expression of their entire confidence in the ability and fidelity of Dr. Park in the arduous duties of his office, and renewedly say to the public: Come to this institution whenever you see fit, inspect it in all its parts, subject of course to reasonable regulations. Dismiss your fears of cruelty and neglect. Dispel your prejudices. There are no dark cells, no underground dungeons, no places of torture, and only the least possible measure of personal

restraint consistent with safety to patients and their attendants. All is done above-board and in the full light of the day. Give your sympathy and co-operation, and aid us in making this, as we desire in the interests of humanity and to the glory of our Commonwealth, the first among institutions of this kind in all the world.

JOHN F. MOORS.

Respectfully submitted,

ALBERT WOOD, *Treasurer.*

SEPTEMBER 30, 1882.

WORCESTER, MASS., Oct. 11, 1882.

The undersigned has this day carefully compared the Treasurer's statement of expenditures for the year ending Sept. 30, 1882, with the vouchers which are on file at the hospital, and found it to be correct. He has also inspected the securities for the invested funds, and found them to correspond with the Treasurer's statement of their market value.

THOMAS H. GAGE,
Auditor of Accounts.

SUPERINTENDENT'S REPORT.

To the Board of Trustees of the Worcester Lunatic Hospital.

GENTLEMEN : — I respectfully present the following fiftieth annual report of the Worcester Lunatic Hospital.

The number of inmates Sept. 30, 1881, was 588 ; 272 males and 316 females.

The number of admissions has been 180 males and 130 females, a total of 310, making the whole number under treatment 898. The number of admissions represents 304 persons, 67 more than were admitted during the previous year.

Twenty-seven males and twenty females were transferred from the Danvers Lunatic Hospital.

One male and one female were transferred from the Taunton Lunatic Hospital.

Twenty-two males were transferred from the State Almshouse at Tewksbury, and five convicts from the State Prison at Concord. Of the whole number, 65 have been re-admissions.

The number of discharges has been 217 — 101 men and 116 women ; of this number, 55, or 25.34 per cent., were recovered, 37 much improved, 42 improved, 27 not improved, 1 not insane, and 55 died, or 6.12 per cent. of the whole number under treatment. Of those who recovered, 17 had been before inmates of this hospital ; of whom 13 had been discharged recovered : 1 twelve times, 1 seven times, 1 four times, 4 three times, 1 two times, and 5 once each ; 3 had been discharged improved and 1 not improved.

These statistics are but additional proofs of the fact mentioned in previous reports of this hospital that " recoveries " in many cases are not permanent cures.

This subject has been elaborated at considerable length in the recent reports of Dr. Pliny Earle of the Northampton Lunatic Hospital. From information received upon this point in answer to circulars sent out inquiring about the subsequent mental condition of those persons who were discharged from this hospital as recovered on their *only admission* and of those who were discharged recovered on their *last re-admission*, it appears that of 1,171 circulars sent, up to Sept. 30, 1882, satisfactory answers have been received from 669. Of this number, 73 men and 80 women remained well and were living at the time of reply, and 83 men and 114 women remained well during life; 19 men and 11 women committed suicide; and the remaining 289 relapsed and had been admitted to other hospitals or had been inmates of almshouses, or had been cared for at home, where they died or are still living. No information could be obtained in 129 cases, and 373 circulars remain unanswered. As was stated in my last report, a good deal of difficulty has been experienced in finding any traces of many of these cases. This is especially true of those who were committed from the cities of the State. They represent a roving population, and the records of the overseers of the poor contain no mention of them after leaving the hospital.

I have been greatly aided by the overseers of the poor of the different towns, and by physicians and others, who have spent much time and shown much interest in obtaining for me the information furnished in Table 30.

To the other tables which accompany this report, prepared with much care, I refer you for various and valuable information.

The large number of convict insane confined in the hospital, suggests again the advisability of separate provision for the criminal and dangerous insane, which is becoming an annual subject of recommendation in most reports made to boards of trustees or to the governor and council of the State.

It was thought that the legislature of last year would act favorably upon this matter; but it was impossible to harmonize the conflicting opinions which were expressed as to the proper plan to be adopted, and the whole matter was

referred to the next legislature. Under the shadow of this defeat it is to be hoped that a vigorous presentation of this plan next winter will meet with better success.

And, apart from the question of expense, which should, of course, receive careful consideration, I am not aware that any serious argument was presented to the Committee on Public Charitable Institutions against the theory of separate buildings for the criminal insane, while the fact that the Trustees and Superintendents of all the State hospitals favored strongly such provision, should entitle it to receive the attention of the next General Court.

Certainly the objection that it would be very difficult to decide who are and who are not criminal is purely technical and trivial. It is practically of very little importance whether they are "convicted" or "unconvicted." They are all supposed to be irresponsible. Another objection which was made, viz., that one insane man is as good or as bad as another, and hence all should be treated alike, seems to me equally weak and false, and if accepted must carry with it an argument for the abolition of all classification; while the whole object of the proposed separation is to secure better classification, larger liberty and more employment for this portion of the insane.

At any rate, the imperative alternative presents itself of adopting some such plan as was recommended by the Board of Health, Lunacy and Charity in their last report, or of building another general hospital for the insane, or of making large additions to some one of those already existing.

It seems to me better to ask for one thing at a time, with the reasonable hope of having the request granted, than to fritter away our opportunity in requests at the same time for separate buildings for epileptics, for dipsomaniacs and for recent or chronic cases of insanity.

By an act of the legislature of 1882, ten thousand dollars were appropriated for the purpose of furnishing the hospital with an additional water supply.

In accordance with an agreement with the city of Worcester, pipes from the Leicester service were continued to the easterly gate-house of Bell Pond, at the expense of the city, from which point the hospital has laid a ten-inch pipe

to our meter-house, a distance of 1,775 feet, and an eight-inch pipe from the meter-house to the hospital, a distance of 2,225 feet, connecting with our fire and domestic service; the pressure on our fire-service pipes being from 80 to 105 pounds. For the distribution through the hospital at a less pressure, a mechanical contrivance invented by Messrs. Ball & Fitts of this city was adopted, and its operation has so far been satisfactory. The work of laying the pipe and making the necessary connections was completed June 17, and was much facilitated by the advice and assistance of Mr. F. E. Hall, water commissioner of Worcester. The expense of this work was \$7,329.96. The balance of the appropriation, amounting with interest to \$2,715.87, was returned to the State treasurer. The hospital has now two independent sources from which to draw water — Leicester reservoir and Bell Pond.

The facilities for heating water have been much increased since the last report by the addition of one of Wm. Allen & Son's Victor Heaters, 48 inches in diameter and 10 feet long, at an expense of \$1,141. A thermometer placed in the pipe as it leaves the heater registers the temperature of the water.

During the year a new piggery has been built, at an expense of \$3,793.21. It consists of a central structure, 36 feet by 50, with conveniences for heating water, slaughtering, and storing straw. From this building, wings 20 feet wide extend in either direction, the whole being 210 feet long. The pens, 20 in number, are 10 feet by 15.

A shed for the protection of the farm wagons and agricultural implements has also been constructed at an expense of \$535.99.

On account of the long continued drouth during the months of July and August, the products of the farm, especially hay, have not been up to the usual quantity. No second crop of grass was cut. The vegetable garden, which had the advantage of sewage irrigation, yielded abundantly, and the hospital was awarded the first premium at the New England Agricultural Society's Fair for the best general collection of vegetables.

The report of the Treasurer shows the finances of the

institution to be in a satisfactory condition. On the 30th of Sept., 1881, the cash on hand amounted to \$14,585.71. At the close of the present year it was \$17,772.03. During the year \$8,238.70 was expended in new buildings and other extraordinary improvements, and paid out of the funds of the hospital. The total current expenses, exclusive of the extraordinary outlay, have been \$116,851.13.

The average number of patients during the year has been 641.65. The annual cost of each patient has therefore been \$182.09, or \$3.50 per week.

Additions to the library have been made, from time to time, during the year, and many books which have been in use for several years have been rebound, the expense being paid from the hospital library fund, which amounted September 30 to \$5,860.95.

It is a pleasing duty to be able to record any gifts to the institution. I have before called the attention of the readers of our annual reports to the generous donations which have, from time to time, been made by the member of your board whose term of continuous service extends over a series of twenty-four years. During the last year, in compliance with a request from his associates upon the board, he has presented the hospital with an admirable oil portrait of himself painted by George Fuller.

The proprietors of the "Worcester Evening Gazette" still continue to furnish gratuitously a copy of their daily paper.

In November, Dr. Charles A. Peabody resigned the position of Second Assistant Physician; to take charge of the Worcester City Hospital, and Dr. Ernest V. Scribner was appointed to fill his place.

The increase in the number of patients rendered necessary a corresponding increase in the number of physicians, and Dr. Everett Flood and Dr. John A. Houston have been added to the staff.

There have been no other changes among the officers of the institution. The difficulty of procuring suitable attendants, especially for the female divisions, is becoming so great that at some seasons of the year the operations of the hospital are seriously affected. More agreeable and congenial

occupation than that of an attendant upon the insane in a public hospital seems to be found by young women with the proper amount of intelligence and industry for such positions. Those who do enter the service soon become tired of the work, and leave. This necessitates frequent changes, to the injury of the institution. I have no remedy to offer for this state of things, and am of the opinion that this difficulty will continue to be an increasing source of anxiety and annoyance to those who have charge of the Massachusetts hospitals.

The measure of success achieved by an institution as large as this depends upon the faithfulness with which the details of its management are attended to by the subordinate officers and employees. There are many who have for a number of years been associated with me in the conduct of the affairs of the institution, and others for a less time, whose unwearyed efforts and patience and interest in their work have contributed largely to the humane care and treatment of the unfortunate inmates of the hospital. They deserve and should receive your commendation.

For the hearty co-operation in my plans, for wise counsel, and for the constant personal encouragement which I receive from your board, I am sincerely grateful.

JOHN G. PARK,

Superintendent.

OCTOBER 1, 1882.

Number of fourth admissions,	—	—	—	137	124	261
Discharged recovered, . .	61	58	119	—	—	—
improved, . .	42	37	79	—	—	—
not improved, . .	21	18	39	—	—	—
Died, ...	6	9	15	—	—	—
Remaining in the hospital Sept. 30, 1882, ...	7	2	9	137	124	261

Showing the Results of Fifth Admissions.

	—	—	—	67	65	132
Number of fifth admissions,	—	—	—	67	65	132
Discharged recovered, . .	32	38	70	—	—	—
improved, . .	15	13	28	—	—	—
not improved, . .	7	8	15	—	—	—
Died, ...	8	4	12	—	—	—
Remaining in the hospital Sept. 30, 1882, ...	5	2	7	67	65	132

Showing the Results of Sixth Admissions.

	—	—	—	36	34	70
Number of sixth admissions,	—	—	—	36	34	70
Discharged recovered, . .	22	20	42	—	—	—
improved, . .	7	8	15	—	—	—
not improved, . .	2	2	4	—	—	—
Died, ...	3	3	6	—	—	—
Remaining in the hospital Sept 30, 1882, ...	2	1	3	36	34	70

Showing the Results of Seventh Admissions.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of seventh admissions, ...	—	—	—	25	23	48
Discharged recovered, ...	14	16	30	—	—	—
improved, ...	5	4	9	—	—	—
not improved, ...	3	1	4	—	—	—
Died, ...	3	2	5	25	23	48

Showing the Results of Eighth Admissions.

Number of eighth admissions, ...	—	—	—	19	18	37
Discharged recovered, ...	9	12	21	—	—	—
improved, ...	9	3	12	—	—	—
not improved, ...	1	2	3	—	—	—
Remaining in the hospital Sept. 30, 1882, ...	—	1	1	19	18	37

Showing the Results of Ninth Admissions.

Number of ninth admissions, ...	—	—	—	15	15	30
Discharged recovered, ...	9	10	19	—	—	—
improved, ...	4	4	8	—	—	—
not improved, ...	1	1	2	—	—	—
Died, ...	1	—	1	15	15	30

Showing the Results of Tenth Admissions.

Number of tenth admissions, ...	—	—	—	13	13	26
Discharged recovered, ...	5	10	15	—	—	—
improved, ...	6	2	8	—	—	—
not improved, ...	1	1	2	—	—	—
Remaining in the hospital Sept. 30, 1882, ...	1	—	1	13	13	26

Showing the Results of Eleventh Admissions.

	Males.	Females.	Total.	Males.	Females	Total.
Number of eleventh admissions, ...	—	—	—	11	12	23
Discharged recovered, ...	3	8	11	—	—	—
improved, ...	6	3	9	—	—	—
not improved, ...	1	1	2	—	—	—
Died, ...	1	—	1	11	12	23

Showing the Results of Twelfth Admissions.

Number of twelfth admissions, ...	—	—	—	9	9	18
Discharged recovered, ...	3	8	11	—	—	—
improved, ...	4	1	5	—	—	—
not improved, ...	1	—	1	—	—	—
Died, ...	1	—	1	9	9	18

Showing the Results of Thirteenth Admissions.

Number of thirteenth admissions, ...	—	—	—	7	8	15
Discharged recovered, ...	3	7	10	—	—	—
improved, ...	3	—	3	—	—	—
not improved, ...	1	—	1	—	—	—
Remaining in the hospital Sept. 30, 1882, ...	—	1	1	7	8	15

Showing the Results of Fourteenth Admissions.

Number of fourteenth admissions, ...	—	—	—	5	7	12
Discharged recovered, ...	3	5	8	—	—	—
improved, ...	2	1	3	—	—	—
Remaining in the hospital Sept. 30, 1882, ...	—	1	1	5	7	12

Showing the Results of Fifteenth Admissions.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of fifteenth admissions, . . .	-	-	-	4	4	8
Discharged recovered, . .	2	3	5	-	-	-
improved, . . .	2	-	2	-	-	-
Died, ...	-	1	1	4	4	8

Showing the Results of Sixteenth Admissions.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of sixteenth admissions, . . .	-	-	-	2	2	4
Discharged recovered, . .	1	2	3	-	-	-
improved, . . .	1	-	1	2	2	4

Showing the Results of Seventeenth Admissions.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of seventeenth admissions, . . .	-	-	-	2	2	4
Discharged recovered, . .	2	1	3	-	-	-
not improved, . .	-	1	1	2	2	4

Showing the Results of Eighteenth Admissions.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of eighteenth admissions, . . .	-	-	-	2	2	4
Discharged recovered, . .	1	1	2	-	-	-
improved, . . .	1	-	1	-	-	-
Died, ...	-	1	1	2	2	4

Showing the Results of Nineteenth Admissions.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of nineteenth admissions, . . .	-	-	-	1	1	2
Discharged recovered, . .	-	1	1	-	-	-
improved, . . .	1	-	1	1	1	2

Showing the Result of Twentieth Admission.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of twentieth admissions, ...	-	-	-	-	1	1
Discharged recovered, ...	-	1	1	-	-	-

Showing the Result of Twenty-first Admission.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of twenty-first admissions, ...	-	-	-	-	1	1
Discharged recovered, ...	-	1	1	-	-	-

Showing the Result of Twenty-second Admission.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of twenty-second admissions, ...	-	-	-	-	1	1
Discharged recovered, ...	-	1	1	-	-	-

Showing the Result of Twenty-third Admission.

	Males.	Females.	Total.	Males.	Females.	Total.
Number of twenty-third admissions, ...	-	-	-	-	1	1
Discharged recovered, ...	-	1	1	-	-	-
